## COVID 19 FAQs regarding ELECTRICITY in Peru

### **Are the companies that provide the electricity service still operating normally?**

Yes, they operate normally, because they are exempt from the emergency rule, as they provide an essential public service to the population. In this case, the companies that are within the chain of production and distribution of electricity (generators, transmitters and distributors) must operate.

### **Are the deadlines for filing complaints or challenges for claims derived from the public electricity service suspended?**

Yes, they are suspended for a period of 30 working days.

### **Do electrical projects under construction have to be suspended during the emergency rule?**

Yes, they have to suspend their activities because they are not within the exception of Supreme Decree 044-2020-PCM.
